

At A Glance is your AquaCUE control center. It acts as a modular dashboard, giving you a snapshot view of current and historical activity, real-time status for any issues that may need attention, and access to all AquaCUE major functions.

To reposition a module, simply click and drag, or use the **Add/Remove** link to add or remove a module. Available modules are described below.

Flow Health

Provides an overview of any flow issues in your water system. Select all the meters in the system or select a specific group to view. Click → to see a list of accounts currently reporting the condition.

Endpoint Health

Number and % of endpoints reporting with and without issues, as well as a list of endpoints with reported issues.

System Water Usage

Snapshot of the water usage in your system. Can be used to compare today's and yesterday's water usage in graph and number formats. Select all the meters in the system or select a specific group to view.

Top Accounts By Usage

Displays the top accounts that are currently using the most water in the system by day, week or month. Up to 40 accounts can be selected. Click column headers to sort. Click → to see account details.

Favorites

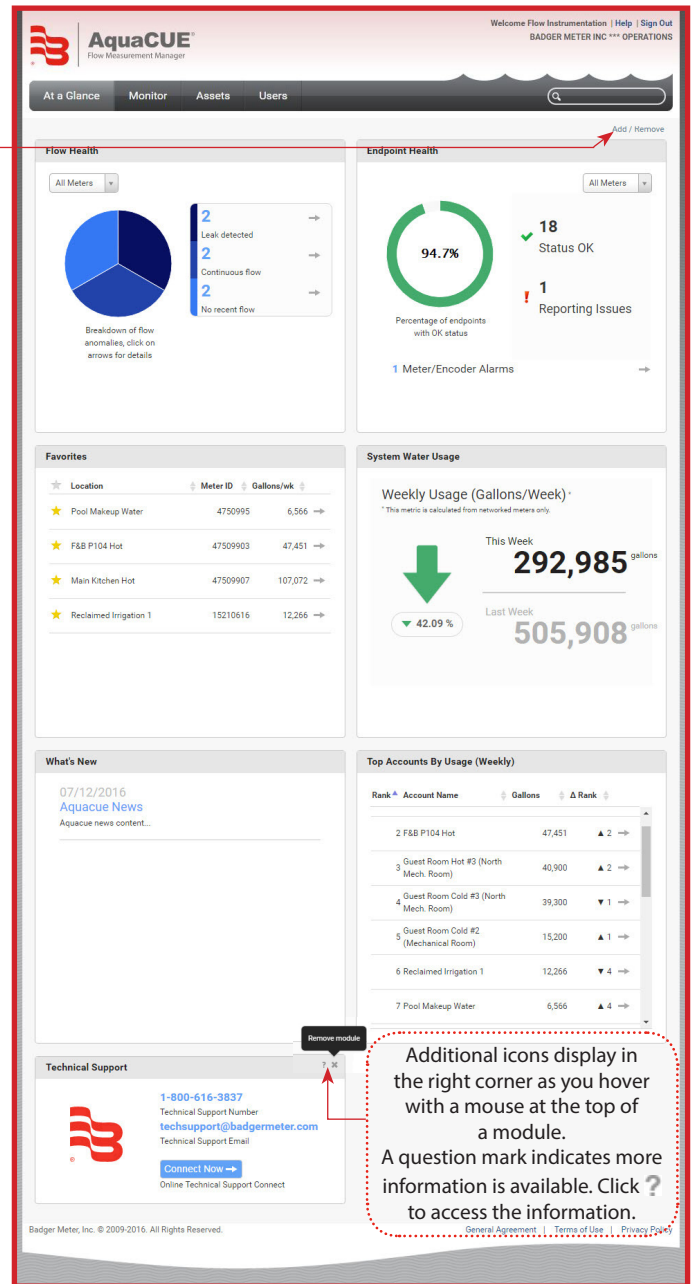

Displays accounts selected as "favorites." Click column headers to sort. To create a favorite, click ★ when viewing the account card on the **Monitor** page. Each user sees only the accounts he or she personally marked as a favorite. Click → to see account details.

What's New

See information on new and upcoming features for the AquaCUE software.

Technical Support

Displays the phone number to call for Badger Meter Technical Support, and a link when you need to connect online.

Additional icons display in the right corner as you hover with a mouse at the top of a module. A question mark indicates more information is available. Click ? to access the information.
